

# **Express Ranches** **NEW MEXICO** **BULL SALE**

**WEDNESDAY**

**March 20, 2019**

**1 p.m. (MST)**

at the Cuervo Creek Ranch  
Newkirk, New Mexico

**SELLING 95**  
**ANGUS & HEREFORD BULLS**

**Big. Stout. Aged Bulls.**

On Behalf of Express Ranches, Welcome...

Welcome to the 10th Express Ranches New Mexico Bull Sale to be held at the Cuervo Creek Ranch, Newkirk, New Mexico. These bulls have been developed on high roughage diet in the semiarid terrain of New Mexico at 5,000-ft. elevation. These bulls are stout, full of muscle and ready to go to work. They will get out and travel the country and have the disposition which cattlemen demand.

We want to give a special thanks to Mark Whetten, his family, and the crew from the Cuervo Creek Ranch for their excellent care and development of this great set of bulls.

One of the most important decisions cattlemen have to make is bull selection. Proper bull selection allows us to optimize opportunities to turn a profit and maximize and, labor and cowherd. At Express, we constantly strive to blend technology with common sense to supply you with the best bulls we can produce.

If Mark Whetten, Kevin Hafner or I can assist or answer any questions or supply additional information, please don't hesitate to call.

Sincerely,

*Jarold Callahan*

BOB FUNK, owner  
JAROLD CALLAHAN, president

## EXPRESS RANCHES BREEDING GUARANTEE

We guarantee that all bulls sold by Express Ranches are fertile to the best of our knowledge and have passed a Breeding Soundness Exam 30 to 45 days prior to the sale. Although all bulls have passed a BSE, we know certain problems can arise after you receive your purchase. To help ensure your investment, Express Ranches will guarantee all bulls selling against breeding injury, and to be sound breeders for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. We will provide you with a satisfactory replacement, if available, or issue you a credit equal to the bull's purchase price minus the salvage value received for that bull. This is not a life insurance policy however. We will not replace a dead animal if it is killed or dies for any reason. Each year we strive to raise the best bulls we possibly can by utilizing common sense combined with all the technology and information available. All the bulls selling have genomically enhanced EPDs and are free of all known genetic defects by pedigree or genetic testing. All bulls selling have been semen checked and are backed with a first breeding season guarantee.

## VOLUME DISCOUNTS

In an effort to show our appreciation to our loyal customers, we once again will be offering our **VOLUME DISCOUNTS!**  
Remember, if you need a large number of bulls we have you covered!

**5-9 BULLS**  
**WE'LL TAKE OFF 5% PURCHASE PRICE**  
**AT SETTLEMENT**  
**10 OR MORE, MAKE IT 10%**

*We hope this will make it a little easier to fill the truck!*

## Express Ranches Bull Development

These Express Ranches' bulls have been developed on a high roughage diet in the semi-arid terrain of New Mexico at 5,000 ft. elevation since the summer of 2018. Complete performance records and EPDs will be available on the bulls. Bulls will be trich and fertility tested. This group of bulls is stout, full of muscle and ready to go to work. These bulls are hard-footed and will get out and travel the country.

## Express Ranches Herd Health

*Recommended by Dr. L.D. Barker, Professional Animal Health, Newcastle, Oklahoma*

### Calves:

#### At Birth – CALF-GUARD1

#### At 3 Months of age

1. Enforce 3
2. SoliDose Respiratory (Manhemia Hemolytica, Pasturella, Multocita, Mycoplasma, Histophilus somonus - Dual Dose Vac)
3. Calvary 9
4. Multimin

#### At Weaning:

1. Bovi-Shield Gold 5 VL5 HB
2. Calvary 9
3. Pinkeye/Footrot Vac (SoliDose)
4. Deworm
5. SoliDose Respiratory (Manhemia Hemolytica, Pasturella, Multocita, Mycoplasma, Histophilus Somonus - Dual Dose Vac)
6. Multimin

### 1 Month Post Weaning:

1. CalfhooD Vac- Heifers
2. Bovi-Shield Gold 5 VL5 HB

### Cowherd:

#### Open- 30 Days Pre-Breeding:

1. Bovi-Shield Gold 5 VL5 HB
2. Calvary 9
3. Multimin
4. Deworm

#### Cows at Preg-Check:

1. 5 way Lepto
2. Deworm
3. 1st-Calf Heifers – Scour Guard 4KC at 6 weeks and 3 weeks prior to calving.

#### Bulls - 30 Days Pre-Breeding:

1. Breeding Soundness Exam
2. Bovi-Shield Gold 5 VL5 HB
3. Calvary 9
4. Deworm
5. Multimin

1 Rota-corona virus vaccine administered prior to nursing.

2 May be given to calves nursing pregnant cows if cows have been vaccinated within the previous year with Bovi-Shield (or PregGuard).

**NOTES** — No more than three gram (-) vaccines administered at one time "5-way" Lepto administered twice annually (~ 6 month intervals) in "high risk" herds and once annually in "low risk" herds Bovi-Shield may be used in calves nursing pregnant heifers/cows or in pregnant heifers/cows if the heifers/cows were vaccinated within 12 months. Bovi-Shield must be given initially to open females. ScourGuard 3 (K)/C should be administered pre-calving if calf scours is a problem. This should be administered twice (at least two weeks apart) the first year, with the second dose given 2-3 weeks before calving. A single annual booster may be given 2-3 weeks before each subsequent calving. Heifers' calves are twice as likely to develop scours as calves born to mature cows.

# Understanding The Numbers...

## Expected Progeny Difference (EPD),

is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## GROWTH...

**Calving-ease Direct (CED)** is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving-ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## CARCASS...

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of

the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## MATERNAL...

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## \$VALUE INDEXES...

**\$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

**FOR THE ZOETIS HD 50K** for Angus percentile rankings, a lower value indicates a more favorable ranking for the trait. For example, a smaller numeric percentile ranking for Zoetis result in birth weight and carcass fat indicates lighter calves and leaner carcasses as the expectation.

If you are making selection decisions for traits that have an EPD provided by the Association, then the EPDs should be considered the selection tool of choice. The EPD and accuracy account for all sources of information available on the animal of interest (e.g., pedigree, own record, weights/measures, genomic results). Using EPD and genomic percentiles separately leads to double counting information and will lessen selection efficiency.

## Traits with HD 50K genomic predictions...

- **(CED)** Calving-ease direct
- **(BW)** Birth weight
- **(WW)** Weaning weight
- **(YW)** Yearling weight
- **(DMI)** Dry matter intake
- **(YH)** Yearling height
- **(SC)** Scrotal circumference
- **(DOC)** Docility
- **(HP)** Heifer pregnancy
- **(CEM)** Calving-ease maternal
- **(Milk)** Milking ability
- **(MW)** Mature weight
- **(MH)** Mature height
- **(CW)** Carcass weight
- **(MB)** Marbling score
- **(REA)** Ribeye area
- **(FAT)** Fat thickness
- **(Tend)** Tenderness

# Retained Interest In Bulls Selling

**T**hese Express Ranches' bulls have been developed on a high roughage diet in the semi-arid terrain of New Mexico at 5,000 ft. elevation since the summer of 2018. Complete performance records and EPDs will be available on the bulls. Bulls will be trich and fertility tested. This group of bulls is stout, full of muscle and ready to go to work. These bulls are hard-footed and will get out and travel the country.

***Plan to join us Wednesday, March 20, 2019, in Newkirk.***
