- Stock Fund was always a favorite of visitors to ORlgen with a valuable combination of individual performance and EPD excellence to complement his structural soundness, freedom of movement and the look of an Angus herd sire and since returning home to Express he has become a favorite of visitors there as well.
- This genomic-enhanced EPD superstar came charging to the top of the spring 2019 calf crop at Express with a phenomenal adjusted 365 weight of 1,630 pounds and an adjusted 365 day URE measure of 18.9 square inches to balance a birth ratio of 91 with a weaning ratio of 109, a yearling ratio of 116 and a URE ratio of 115 as his dam's first natural calf.
- His dam now has weaned four calves with an average ratio of 108 at both weaning and yearling and her three progeny scanned have the average URE ratio of 108 one would expect with Stock Fund's adjusted 365 day URE measure of 18.9 sq. inches.
